# Tommi Knives™

Log cabins were invented by the Finns who brought that knowledge to the U.S. in 1638.

T10D

▲ **Rugged Tommi - T10D** with a damascus blade.

These are the original Tommi knives that started the award winning tradition for razor sharpness and overall quality, hand hammered over a charcoal fire as it has been done for generations since 1610. With knowledge passed from grandfather to father to son, this is the optimal knowledge of knife making, developed to produce some of the best knives available anywhere.
