

Camping Knives

Finland is Europe's most heavily-forested country. Forests cover 74.2% of the land area.

▼ **R Line UHC Series** The Ultra High Carbon steel originates from the legendary Wootz Damascus blade steel. The outstanding cutting properties result from its hardness, HRC 64-66, and numerous "biting" carbides. UHC blades hold up longer than ordinary carbon blades.

▼ **R Line and AK Line** Hand forged carbon steel blades are rugged looking from the blacksmith's forge. These are basic working tools with no time wasted on unnecessary features. Easy to sharpen and resharpen for years of use for all kinds of tasks. The arctic birch handles come in a variety of sizes and shapes.
